Adversity Quotient

Instructions: Imagine the following events as if they were happening right now in your organization (not in your personal life). Circle the number that represents your answer to each of the related questions.

1. You suffer a major financial setback. To what extent can you influence this situation?
   Not at all 1 2 3 4 5
   Completely

2. You are overlooked for a promotion. To what extent do you feel responsible for improving the situation?
   Not responsible at all 1 2 3 4 5
   Completely responsible

3. You are criticized for a big project that you just completed. The consequences of this situation will:
   Affect all aspects of my life 1 2 3 4 5
   Be limited to this situation

4. You accidentally delete an important email. The consequences of this situation will:
   Last forever 1 2 3 4 5
   Quickly pass

5. The high-priority project you are working on gets canceled. The consequences of this situation will:
   Affect all aspects of my life 1 2 3 4 5
   Be limited to this situation

6. Someone you respect ignores your attempt to discuss an important issue. To what extent do you feel responsible for improving this situation?
   Not responsible at all 1 2 3 4 5
   Completely responsible

7. People respond unfavorably to your latest ideas that you feel can get you past a crisis. To what extent can you influence this situation?
   Not at all 1 2 3 4 5
   Completely

8. You are unable to take a much-needed vacation. The consequences of this situation will:
   Last forever 1 2 3 4 5
   Quickly pass

9. You hit every red light on your way to an important appointment. The consequences of this situation will:
   Affect all aspects of my life 1 2 3 4 5
   Be limited to this situation

Adversity Quotient

10. After extensive searching, you cannot find a critical document. *The consequences of this situation will:*
   Last forever 2 3 4 5
11. You workplace is understaffed. *To what extent do you feel responsible for improving this situation?*
   Not responsible at all 2 3 4 5
12. You miss an important appointment. *The consequences of this situation will:*
   Affect all aspects of my life 2 3 4 5
13. Your personal and work obligations are out of balance. *To what extent can you influence this situation?*
   Not at all 2 3 4 5
14. You never seem to have enough money. *The consequences of this situation will:*
   Last forever 2 3 4 5
15. You are not exercising regularly though you know you should. *To what extent can you influence this situation?*
   Not at all 2 3 4 5
16. Your organization is not meeting its goals. *To what extent do you feel responsible for improving this situation?*
   Not responsible at all 2 3 4 5
17. Your computer crashed for the third time this week. *To what extent can you influence this situation?*
   Not at all 2 3 4 5
18. The meeting you are in is a total waste of time. *To what extent do you feel responsible for improving this situation?*
   Not responsible at all 2 3 4 5
19. You lost something that is very important. *The consequences of this situation will:*
   Last forever 2 3 4 5
20. Your boss (or client) adamantly disagrees with your decision. *The consequences will:*
   Affect all aspects of my life 2 3 4 5

Adversity Quotient

Scoring
Your AQ response is comprised of four CORE dimensions. Understanding them is the first step toward improving your response to adversity, expanding your capacity, and, ultimately, increasing your overall AQ. Insert each of the 20 numbers you circled on the Adversity Response Profile in the corresponding boxes that appear below. Then insert the total for each column in the corresponding box. Add the four totals and then multiply that number by two for your final score.

<table>
<thead>
<tr>
<th>C</th>
<th>O</th>
<th>R</th>
<th>E</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. ___</td>
<td>2. ___</td>
<td>3. ___</td>
<td>4. ___</td>
</tr>
<tr>
<td>7. ___</td>
<td>6. ___</td>
<td>5. ___</td>
<td>8. ___</td>
</tr>
<tr>
<td>13. ___</td>
<td>11. ___</td>
<td>9. ___</td>
<td>10. ___</td>
</tr>
<tr>
<td>15. ___</td>
<td>16. ___</td>
<td>12. ___</td>
<td>14. ___</td>
</tr>
<tr>
<td>17. ___</td>
<td>18. ___</td>
<td>20. ___</td>
<td>19. ___</td>
</tr>
</tbody>
</table>

Total C =___ Total O =___ Total R =___ Total E =___

Total C+O+R+E x 2 = ARP Score =________

The average ARP score is 147.5. What’s your score? The higher the better. Now, look at your CORE breakdown and determine which aspects of the AQ you need to improve.

C = Control
To what extent can you influence the situation? How much control do you perceive you have?
Those with higher Aqs perceive they have significantly more control and influence in adverse situations than do those with lower Aqs. Even in situations that appear overwhelming or out of their hands, those with higher Aqs find some facet of the situation they can influence. Those with lower Aqs respond as if they have little or no control and often give up.

O = Ownership
To what extent do you hold yourself responsible for improving this situation? To what extent are you accountable to play some role in making it better?
Accountability is the backbone of action. Those with higher Aqs hold themselves accountable for dealing with situations regardless of their cause. Those with lower Aqs deflect accountability and most often feel victimized and helpless.

R = Reach
How far does the fallout of this situation reach into other areas of your work or life? To what extent does the adversity extend beyond the situation at hand?
Keeping the fallout under control and limiting the reach of adversity is essential for efficient and effective problem solving. Those with higher Aqs keep setbacks and challenges in their place, not letting them infest the healthy areas of their work and lives. Those with lower Aqs tend to allow a setback in one area to bleed into other, unrelated areas and become destructive.

E = Endurance
How long will the adversity endure?
Seeing beyond even enormous difficulties is an essential skill for maintaining hope. Those with higher Aqs have the uncanny ability to see past the most interminable difficulties and maintain hope and optimism. Those with lower Aqs see adversity as dragging on indefinitely, if not permanently.
